***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,24 and 25, drawn to a hinge, classified in class 16.
- II. Claims 26-29, drawn to a window cover, classified in class 160, subclass 199.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the hinge in the combination claims do not recite, among other things, the 180 degrees of rotation limitation. The subcombination has separate utility such as a hinge for a hatch for a cargo ship.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
